Summary

A dedicated and skilled full stack developer with 2+ years of experience across web application development and optimization. Proven experience in both frontend and backend technologies, including Angular, JSP, Java Spring Boot, and Java Spring MVC, integrated with Oracle Database. Effective leader who performs well in collaborative environment with coworkers, managers and clients. Adept at managing client requests, creating functional solutions, and ensuring code quality. Seeking to work in an environment that is conducive to my intellectual, professional, and personal growth, where I can contribute significantly to the growth of the team/organization with strong experience and expertise leading to success.

Experience

Software Developer – 02/2022 to 01/2024
Valoores, Beirut, Lebanon

- Maintain and optimize web applications using Angular and JSP on the frontend, and Java Spring Boot and Java Spring MVC on the backend, ensuring high performance and user responsiveness.
- Integrate Oracle Database into applications to enhance data management and system functionality.
- Efficiently manage client requests, transforming them into practical, functional solutions tailored to business needs.
- Develop clean, efficient code in accordance with specifications, employing SonarQube and Veracode to uphold best practices and code quality.
- Collaborate closely with developers, UX designers, and analysts using Microsoft Teams for communication and SVN for version control, ensuring seamless integration and optimal team performance.
- Identify areas for improvement in existing programs, developing strategic modifications to enhance system efficiency and user functionality.
- Craft detailed technical documentation using Microsoft Word and Google Docs, ensuring precise communication and optimal knowledge transfer for reference and reporting purposes.
- Understand the company's current process and requirements and integrating sets of data into frameworks used to develop practical solutions as well as technical assistance.

Software Developer – 10/2024 to present
Lyst Technologies, Beirut, Lebanon

- Manage and enhance web applications by leveraging Java Spring Boot and MuleSoft AnyPoint Studio on the backend, ensuring efficient integration, optimal performance, and an excellent user experience.
- Integrate Oracle Database, PostgreSQL and Microsoft SQL Server into applications to enhance data management and system functionality.
- Skillfully handle client requirements, translating them into effective and customized solutions aligned with business objectives.
- Work collaboratively with developers, UX designers, and analysts, utilizing Skype for communication and SVN for version control to ensure smooth coordination and efficient team workflows.
- Analyze existing programs to pinpoint improvement opportunities and implement strategic updates to boost system performance and enhance user experience.
- Assess the company's processes and requirements, integrating data into frameworks to create effective solutions and provide technical support.
- Design and implement services for the Omni-Channel platform, enabling unified functionality and a cohesive user experience across all channels.
- Utilize BIRT Report Designer to create tailored reports based on client requests, incorporating complex SQL

queries to meet advanced data analysis requirements.

Freelance Projects

NanoVine – 03/2022 to 06/2022
- Designed and developed a dynamic movie display website using HTML, CSS, and Bootstrap for the frontend.
- Implemented backend management with PHP and PHPMyAdmin.
- Enabled users to view trailers, write reviews, and personalize content through a genre selection feature.
- Implemented user authentication to enhance engagement and create tailored experiences.

Credit Card Authentication – 01/2022 02/2022
- Developed a sophisticated credit card validation website using Node.js and Express.js.
- Implemented the Luhn Algorithm to authenticate the validity of 16-digit credit card numbers, specifically for use within the USA.
- Engineered robust data management using PostgreSQL.
- Designed user interface to prompt users to enter a 16-digit credit card number, a 3-digit CVV, cardholder name, and expiration date.

Education

Bachelor of Science in Computer Science – 2022
Lebanese International University, Beirut, Lebanon
